\* Maximum funds for a water impoundment dam are \$10,000 per fiscal year. To make use of NSWCP funds over \$5,000 for a water impoundment dam, the applicant should not apply for any other Land Treatment funds in that fiscal year. A landowner may receive up to \$5,000 cost-share for a conservation practice installed on any parcel or group of contiguous parcels covering up to 160-acres that is under his or her ownership. The landowner will not be eligible for any additional cost-share for that practice on the 160-acre parcel or group of connected parcels during the design life of the practice.
