

# MANMADE BOULDERS

---

This would be a great way to add fishing access without a wooden pier structure.

# CONCRETE RETAINING WALL

---

Textured concrete would be cool around the island at Recharge as stabilization.

# SIGNS

---

I liked the signpost reminder that this is a park but also a flood control structure with historic flows.

## 100-YEAR FLOOD ELEVATIONS

---

Series of elevations may also be cool  
to see.

## PICNIC TABLE

---

I liked that this didn't have a bench style seat. Bench seats can be hard for older patrons or those with mobility issues. This type of picnic table may be more accessible.

# BENCH

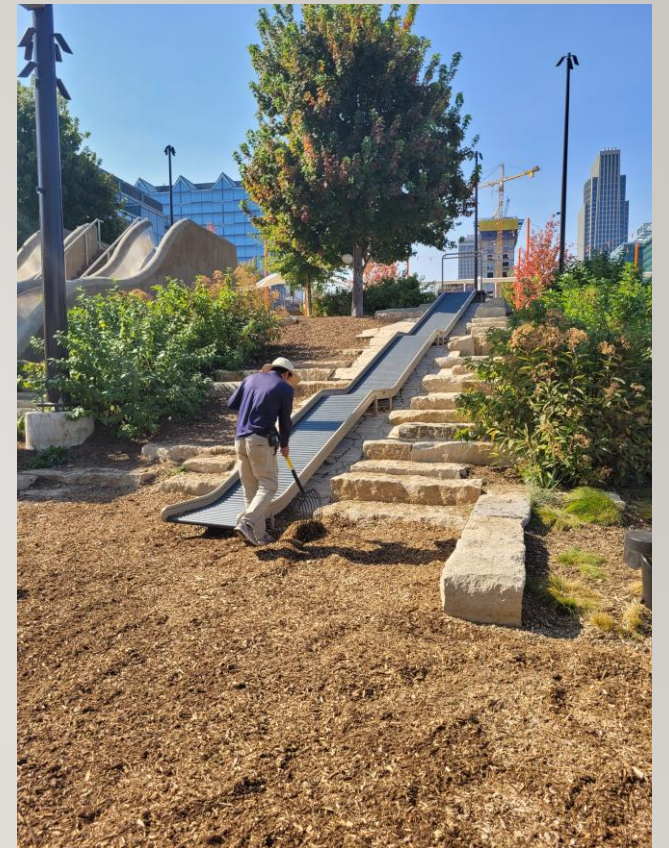

Bench around tree

# SLIDES

---

Slides – Roller Slide

# HAMMOCKS

---

# SHADE

---

The mixture of steel and stone provides contrast and interest.

# RETAINING WALL

---

Large stone used for retaining wall.

# RETAINING WALL SEATING

---

I liked the use of immovable stone for seating. Like the amphitheater.

## STONE BENCHES ALONG WALKING TRAIL

Immovable stones for seating similar to amphitheater in green space.

# COVERED SEATING

---

I thought this was innovative since it provides shade but rain and snow can get through to keep campers and homeless from sheltering underneath.

# FALL SAFE TURF

---

You do not have to fluff or replace lost mulch.

## FIREPIT, LANDSCAPING, DECOMPOSED GRANITE

---

This entire setup neat. Semi-private seating with a fire ring.

## STONE BENCHES ALONG WALKING TRAIL

Immovable stones for retaining wall along trail  
and smaller fire pit with seating.

# MANICURED GREENSPACE

---

The new work at Pioneer Trails for increased fishing access could be manicured for ground seating.

# MANMADE NATURAL LOOK SEATING/CLIMBING

---

This is unmovable and looks natural.

# LINE OF PORCH SWINGS

---

How cool would this be at all our rec areas.

# BRIDGE

---

Bridges to connect walking trails at all of our rec areas.

## SEATING AND TABLES

---

These heavy-duty deck chairs were very comfortable and durable.

# PLAYGROUND EQUIPMENT

---

This teeter-totter was “old school” made with wood, metal, and old tires—very durable and it was fun (possibly spring assisted?)

# RULES SIGNS

---

Rules signs are worded well and are clear and inviting.

# HORSESHOES

---

- This could fit well at Recharge Lake. If space exists.
- Low maintenance fun!

# PING PONG TABLE

---

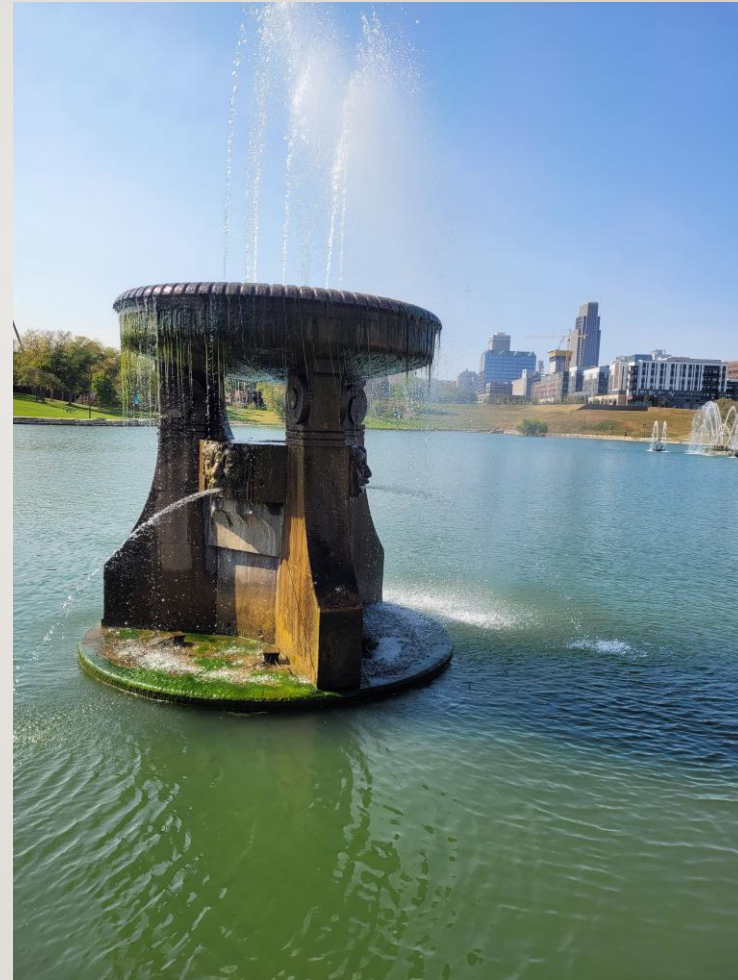

Steel Tables

## FOUNTAIN FEATURES

---

Could potentially have water quality benefits but does take away from the natural feel of lakes. Are there more natural features like waterfalls etc.?

# MEMORIAL FOUNTAIN

---

- In honor of NRD Contributor
- Fountain with Seating

# WATER WHEEL

---

Could work water well pump  
near lake?
